New SSV Mixer Brochure Available Lightnin Stainless Sanitary Vertical Mixers

ROCHESTER, NY (2003) – The New SSV Mixer brochure is now available from Lightnin. Our next generation of SanStar™ mixers includes the latest line of Stainless Sanitary Vertical (SSV) Mixers – engineered to meet the biotechnology and pharmaceutical industry's most stringent requirements for dependable performance and clean operation.

A member of Lightnin's SanStar™ series of mixers, SSV mixers feature 300 series stainless steel construction and operate on a minimum footprint for vessels up to 20,000 liters in a vertical, in-line design for closed tank applications. Designed for use in aseptic environments, SSV mixers can be outfitted with bio-pharm single or double, wet or dry mechanical seals. An optional sanitary purge gland also is available for full CIP/SIP processes. The mixers can be mounted on 3", 4" or 6" sanitary clamping ferrules to minimize head space requirements. ANSI flange mountings also are available.

The units are available in a wide range of output speeds from 100 to 290 rpm. Stainless steel wash down and inverter-duty electric motors provide maximum cleanliness and flexibility, and a variety of low shear, high efficiency impeller configurations complete the full spectrum of process and mechanical requirements. Smaller fractional horsepower units with smaller footprints and a full range of validated impellers also are available.

The brochure effectively addresses Lightnin's exclusive process guarantee and a lifetime of mixing leadership in virtually every known biotechnology and pharmaceutical application. To demonstrate that FDA-mandated Good Manufacturing Practices (cGMP) guidelines have been met, biotechnology and pharmaceutical customers automatically receive Quality Assurance Documentation (QAD) when they purchase an SSV mixer.

Lightnin, A Unit of SPX Process Equipment, is a global provider of technical products and systems, industrial products and services, solutions and vehicle components. For more information about SSV mixers or any other Lightnin Mixer, contact a local LIGHTNIN Sales Representative. Visit Lightnin's website at www.lightninmixers.com, or call 1-888-MIX-BEST (U.S. and Canada), 585-527-1623 (worldwide).
