SPX Process Equipment

SPX Process Equipment Introduces the NEW Premier Mill SuperFLX Horizontal Media Mill

Delavan, WI – April 27, 2009 – The New Premier Mill SuperFLX Horizontal Media Mill offers the features and flexibility that a demanding process requires. This single machine with patented technology can be transformed to process single-pass, multi-pass, high flow recirculation, low to high viscosity materials, fine to large particles and agglomerates with a few simple changes in a compact design. Scale up is precise from Lab and Pilot Plant units. Ideal for dispersions and color concentrations for Paint, Ink, Industrial and Plastics. Also, for grinding suspended solids in AgChem, Pharmaceutical, Food and Minerals.

Features:

- Cartridge Seal: provides extended wear life and reduced maintenance
- Stationary Screen: allows use of ultra-fine grinding media
- Tangential Product Inlet: for maximum efficiency in product flow pattern grinding chamber
- Milling Disc Options: to suit any application including Premier's patented Axial Pin (AP) high energy milling discs
