### **PENTAX Hygienic**

#### **The Dynamic In-line Mixer**

The Bran+Luebbe dynamic inline Mixers, proven for decades in applications like oil degumming, high concentrated surfactant dilution, saponification and established in all sorts of chemical or sanitary process.

The unique advantage of the rotor- stator mixer design is the combination of the premix- chamber and the 6- stage mixing unit. With this design, you will get excellent mixing results, especially for sheer sensitive raw materials.

To be fit for higher sanitary standards, the design of the Bran+ Luebbe Pentax was modified, covering the hygienic design and EHEDG certification.
